■ Quadrat Locations

Quadrats are marked with small metal tags glued to rocks and are long term monitoring sites. Please avoid disturbing this area.

Quadrat	Latitude	Longitude
B1	-66.3678500	110.5856918

Location data indicate centre of 25 x 25 cm quadrats.

Letters B, T, L in Quadrat codes denote vegetation community type:  
 B = Bryophyte,  
 T = Transitional,  
 L = Lichen.

The letters on the tags in the field are B, M, A where  
 B = Bryophyte,  
 M = Transitional,  
 A = Lichen.

Tag location data was collected by Arko Lucieer on 22-23/01/2010 using Leica 1200 dual frequency RTK GPS with a local base station. Estimated accuracy is 2 cm in X and Y. Locations were manually edited by Diana King on 29/10/2014 using the orthophoto as reference, to indicate the centre of each quadrat, rather than the tag location.
