

Magnetic Declination 1965.0
varies from 54°30' to 52° West
increasing 14' annually.

International Spheroid
Universal Transverse Mercator Projection
Zone 40

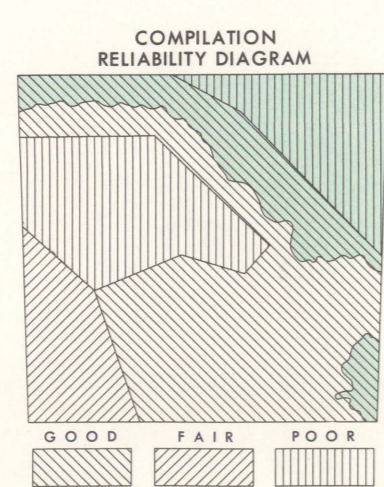

Produced by the Division of National
Mapping, Department of National
Development, Canberra, Australia.

Compiled from trimetrogon air
photography, horizontal and
vertical control obtained by
Australian National Antarctic
Research Expeditions 1954 to
1966, and other information
including United States tri-
metrogon air photography 1947.

FIRST EDITION SEPTEMBER 1967

NMP/61/08-07

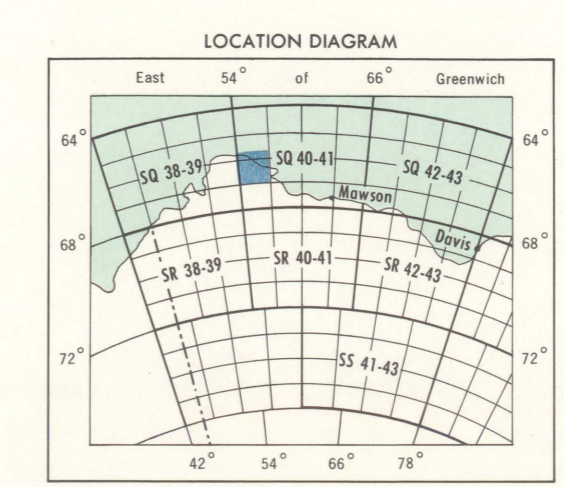

PRINTED BY THE COMMONWEALTH GOVERNMENT PRINTER, CANBERRA, A.C.T.

Contour interval: 200 metres

Heights in metres

| LEGEND | |
|--|---------------------------------|
| Ice coastline (definite) | Height on ice, rock (750 - 750) |
| Ice coastline (approximate) | Summit (not heighted) |
| Ice-free coastline (definite) | Astro control station |
| Ice-free coastline (approximate) | Survey control station |
| Contour on ice or snow (definite) | Traverse route with spot height |
| Contour on ice or snow (approximate) | Proved route |
| Contour on ice-free area (definite) | Melt stream and lake |
| Contour on ice-free area (approximate) | Ice hillock |
| Depression contour on ice or snow (definite) | Small nunatak |
| Depression contour on ice-free area (definite) | Emperor penguin rookery |
| | Ice shelf and front |
| | Glacier tongue |
| | Glacier |
| | Crevasse |
| | Disturbed ice |
| | Ice-free area |
| | Moraine |

Names have been approved
by the Antarctic Names
Committee of Australia.

CAUTION
Absence of the depiction of
crevasse does not necessarily
indicate a crevasse-free area.
