CAPE DENISON
HISTORIC SITE
COMMONWEALTH BAY ANTARCTICA

The Australian Antarctic Expedition was organized and led by Douglas Mawson, and included notable scientists and crew members. The expedition, which lasted from 1911 to 1914, was aimed at exploring the Antarctic and its surrounding waters, as well as conducting scientific research. The expedition was funded by a combination of private donations and government grants. Mawson was the leader of the expedition, and the ship used was the Discovery. The expedition made significant contributions to the understanding of the Antarctic region, including the discovery of Cape Denison.

BANZARE 1929–1931

The BANZARE (Belgian Antarctic Expedition) was a joint mission between Australia and Belgium. It was led by Belgian geologist and explorer Pierre de la Rive, who was also the leader of the Belgian Antarctic Expedition. The expedition was funded by the Australian Commonwealth Scientific and Industrial Research Organization (CSIRO) and the Belgian Foundation for Antarctic Research (BFR). The goal of the expedition was to conduct scientific research and exploration in the Antarctic region.

The expedition made significant contributions to the understanding of the Antarctic region, including the discovery of Cape Denison.

GUIDELINES FOR VISITORS

- Visitors must not touch any historic or scientific equipment or artifacts.
- Visitors must not damage or deface historic or scientific equipment or artifacts.
- Visitors must not remove any historic or scientific equipment or artifacts from the site.
- Visitors must not remove any historic or scientific equipment or artifacts from the site.

THE ANTARCTIC TREATY

The Antarctic Treaty is an international agreement that was signed in 1959 and is currently in force. The treaty outlines the principles that govern the use of the Antarctic region, and it also protects the region from pollution and the possibility of nuclear testing. The treaty has been signed by 53 countries, and it is currently in force.
