

MACQUARIE ISLAND

TASMANIA
Southern Sheet

SCALE 1:50 000

Projection: Universal Transverse Mercator, Zone 57
Horizontal Datum: World Geodetic System 1984
Vertical Datum: Mean Sea Level

True, Grid and Magnetic North are shown diagrammatically for the centre of Macquarie Island. Magnetic North is correct for 2001 and moves easterly by about 3.6' each year.

- Walking track
- Escarpment
- Lake
- Stream
- Contour (20m interval draft contour)
- Spot height (GPS, height approximate)
- Spot height (DPIWE database)
- Hillock
- Dam
- Grave(s)
- ANARE Station
- Mast
- Historic ANARE hut
- Digestor(s)
- Trypot(s)
- Shipwreck
- Difficult coastline to access. Should be avoided.
- Dangerous coastline. Must be avoided.

Produced by the Australian Antarctic Data Centre
September 2001

- Penguin colony
- Gentoo Penguin
- King Penguin
- Rockhopper Penguin
- Royal Penguin
- Seal colony
- Fur Seal
- Southern Elephant Seal
- Flying bird breeding colony
- Black-browed Albatross
- Grey-headed Albatross
- Southern Giant-Petrel
- Wandering Albatross

Wildlife locations may vary within a season or from season to season.

Rockhopper and Royal Penguins may be found at the locations indicated from about late September to April.

The other penguin species and the seals may be found at the locations indicated at any time of the year.

Southern Elephant Seals may be found anywhere on the east coast of Macquarie Island and at the locations indicated on the west coast of the island.

The flying bird species may be found at the locations indicated during the following time periods:

- | | |
|--------------------------|--------------------|
| Black-browed Albatrosses | September to April |
| Grey-headed Albatrosses | September to May |
| Southern Giant-Petrels | September to April |
| Wandering Albatrosses | all year |
- Light-mantled sooty Albatrosses breed on the coastal slopes of Macquarie Island from about late September to May.
Northern Giant-Petrels breed on the coastal flats of Macquarie Island from about late August to early March.
Non-breeding aggregations of Northern and Southern Giant-Petrels are present on Macquarie Island all year round.

Protected Area
Closed annually from November 1 to April 30

Avoid coastal travel during Summer between Rockhopper Point and Caroline Point on the west coast and Raine Point and Hurd Point on the east coast to minimise wildlife disturbance.
